

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-31 (previously canceled)

32. (amended) A flexible container for ~~fluids~~ liquid cleanser comprising:

at least two flexible members forming a chamber therebetween for containing ~~fluids~~ liquid cleanser, said flexible members have a modulus of elasticity conducive to liquid containment and gaseous inflation; and

5 a flexible closure means, coupled to at least one of said flexible members, having a hollow cylinder having an open end and a sealed end, said sealed end extending into the chamber, and a transfigurable slit disposed near the sealed end, for selective flow restriction, and for repetitive filling and expelling ~~fluids~~ said liquid cleanser from said chamber in response to squeezing force selectively applied to ~~said closure means~~ at least one of said two flexible
10 members;

said ~~closure means~~ flexible closure further including a stopper ~~means~~ for sealing said open end of said hollow cylinder.

33. (amended) The A flexible container of Claim 32, ~~for fluids, the container further~~ comprising:

~~a first flexible member formed of vinyl material having a modulus of elasticity~~
5 ~~conductive to liquid containment and gaseous inflation;~~

~~a second flexible member formed of vinyl material having a modulus of elasticity~~
~~conductive to liquid containment and gaseous inflation attached to said first flexible member for~~

~~forming a chamber therebetween;~~

~~flexible sealing means for flow restriction, having a transfigurable slit, attached to at least one of said flexible members for repetitive transfer through said transfigurable slit of liquid and gaseous fluids into and from said chamber in response to squeezing force applied to said sealing means; and~~

~~a means hanger for hanging said flexible container attached to one of the said at least two flexible members or to the flexible sealing means; and~~

~~wherein said at least two flexible members are formed of vinyl material.~~

34. **(amended)** A bag for containing ~~fluid~~ liquid cleanser, comprising:

a flexible bag body, said flexible bag body containing liquid cleanser;

a flexible closure means having a flared end attached to said bag body, a retractable valve cylinder having a sealed end which is extendable into said flared end and a slim transfigurable slit formed in the cylinder adjacent to said sealed end for fluid exchange in response to squeezing force applied thereto; and

a plug for sealing the other end of the cylinder.

35. **(previously presented)** The container of Claim 34, further including a hangar.

36. **(New)** The container of Claim 32, further comprising at least one insert suspended in said liquid cleanser.

37. **(New)** The container of Claim 36, wherein said at least one insert is of a predetermined size that prevents expulsion of said at least one insert from said flexible container via the valve.

38. (New) The container of Claim 33, further comprising at least one insert suspended in said liquid cleanser.

39. (New) The container of Claim 38, wherein said at least one insert is of a predetermined size that prevents expulsion of said at least one insert from said flexible container via the valve.

40. (New) The container of Claim 34, further comprising at least one insert suspended in said liquid cleanser.

41. (New) The container of Claim 40, wherein said at least one insert is of a predetermined size that prevents expulsion of said at least one insert from said flexible container via the valve.

42. (New) The container of Claim 32, wherein said chamber contains a liquid emulsifier.

43. (New) The container of Claim 32, wherein said at least two flexible members form a chamber therebetween having a recognizable shape according to a predetermined plan.

44. (New) The container of Claim 43, wherein said recognizable shape is selected from the group consisting of animal designs, geometric shapes and flower designs.
